## **DISTRICT WIDE CLEANING AND SANITIZING PLAN**

Today's cleaning procedures have drastically changed due to Covid-19. The Director of Facilities and the Custodial Contractor (SSC) will be implementing a plan to clean and sanitize all district buildings during the pandemic. All QSCD Facilities staff and Custodial staff have been trained through Environmental Control Systems along with a Certified Industrial Hygienist.

- Understand SARS-CoV-2 and COVID -19
- Know symptoms and transmission routes
- Introduce basic industrial hygiene principals for worker/personal protection
- Understand the difference between a respirator, surgical mask and face covering
- Understand the difference between cleaning and disinfection

The typical duties of Building Leaders and Maintenance staff have been altered to assist with sanitizing of high touch points. Each building will receive direction on how to continuously sanitize the building during the school day to ensure all areas are disinfected at least three times a day.

Normal contractual cleaning provided by SSC will continue once students leave the building. In addition, the Board approved deep sanitizing contract will take place on a nightly basis once all other cleaning is complete.

All cleaning/sanitizing will be conducted in compliance with the CDC requirements and the Bucks County Department of Health.

SSC will be creating and implementing a detailed daily sanitizing check list to all day porters.
